Projects

Cryptocurrency Tracker ⧉
React Ant-design Redux-Toolkit APIs

- I built this crypto-currency app that keeps you updated with the latest news and information about crypto-currencies.
- I featured a home page that shows the Top 10 Cryptocurrencies in the world by market cap and also displays the Top 10 crypto currency news.
- I also added a news page that exhibits over 50 Cryptocurrency news and it also contains a search bar that can be used to filter out news based on a specific query.
- I added a cryptocurrency page that displays the top 100 cryptocurrencies along side it's details in the world and it also contains a search bar to filter the cryptocurrencies
- I implemented a crypto-details page that displays the individual details of a selected crypto-currency which shows details like the history of a currency, the market cap and other details that are specific to that currency..
- I used Git for version control and it's hosted live on Netlify

E-commerce API ⧉
NODEJS MONGODB EXPRESS

- I architected a fully functional E-commerce REST API that can be connected to a front-end and an Admin Panel.
- This API was built with Nodejs, Express, and MongoDB and it comes with the full functionality of an e-commerce application.
- It composes of 4 routes which are: product route, user route, order route and the cart route.
- I also implemented a stripe payment route that can be used to process payment.
- I used MongoDB atlas to store my data
- I used POSTMAN to test all of my API endpoints

Skills

Front End
- HTML
- CSS
- Javasript
- React
- SASS
- Tailwind CSS

Backend
- NodeJs
- ExpressJs
- MongoDB
- Mongoose

Tools
- Git
- Postman
- Netlify
- Firebase

Articles

What are Objects in JavaScript? ⧉

Introduction to Hooks in React.js ⧉

Education

B.Eng Electrical Engineering
University of Port-Harcourt
2018 – present
Port-Harcourt, Nigeria

Interests

- Football
- Music
